

Vaccine Assist Programme

When do I get my vaccine?

The South African Government has developed a 3-phase rollout to ensure the most vulnerable in our population get vaccinated first:

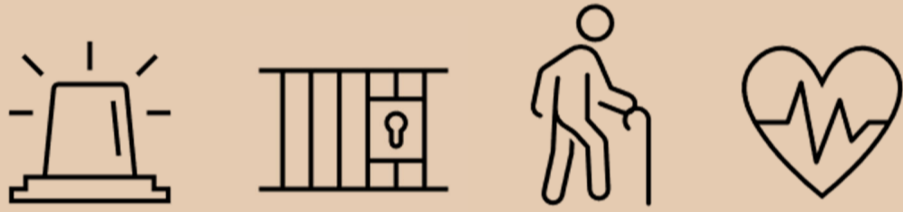

Phase 1

February 2021

Healthcare workers

Phase 2

May 2021

Essential workers, persons in congregate settings (like prison), persons over 60 years, persons over 18 years with co-morbidities (chronic diseases)

Phase 3

November 2021

All persons over 18 years old

If you're a healthcare worker or over 60, you can register now!
